Education

St. Joseph's College of Engineering

Bachelor of Engineering in Computer Science (CGPA: 9.13 / 10.00)

May 2025

Chennai, Tamil Nadu

- **Relevant Coursework:** AWS Certified Cloud Practitioner(CLF-C02), Databricks Certified Generative AI Engineer Associate, The Complete 2022 Web Development Bootcamp, Database Management System

Experience

Accenture

Full Time - Packaged App Development Associate

Oct 2025 - Present

Bengaluru, Karnataka

- Trained in foundational concepts of Software Development Life Cycle (SDLC), web development technologies, and cloud computing platforms.
- Expanded knowledge on feature development, bug fixing, and code reviews within an agile team environment.

ProjectSense.Org

Internship - Full Stack Developer

Dec 2023 – Jan 2024

Chennai, Tamil Nadu

- Transitioned an **open-source project** to a proprietary software solution, boosted user engagement **by 40%**.
- Formulated **RESTful API** modules, **backend** using **NodeJS** and **ExpressJS**, and **frontend** using **ReactJS**, played a key role in reshaping the project.

Projects

AI-Powered Trip Planner Web Application | MERN Stack, Ollama, LangChain, RAG

- Developed a full-stack AI-powered trip planning platform using **MVC architecture**, integrating **JWT-based authentication** and **Redis caching** for secure and scalable backend operations.
- Built a **Retrieval-Augmented Generation (RAG) pipeline**, enabling context-aware itinerary generation using LLMs through Ollama.
- Designed modular AI workflows using LangChain with planned support for **Agentic AI capabilities**, enabling future autonomous and intelligent travel planning enhancements. Github: [Link](#)

Leaf Detection and Classification System | Python, PyTorch, Flask

- Engineered an end-to-end leaf detection and classification system using Faster R-CNN and ResNet50, enabling automated analysis of 30 leaf species from complex multi-leaf images.
- Achieved **92.4%** classification accuracy and **88.7% mAP** in detection by training on a custom dataset of **7,125 images** (multi-class, multi-object).
- Reduced manual inspection time by over **60%** and improved detection reliability in varied lighting and occlusion scenarios through robust model fine-tuning. Github: [Link](#)

TrashTriage | HTML, CSS, JavaScript, Flask, MySQL

- Conceptualized and built a robust **full-stack website** for waste identification, achieving an accuracy rate of **85%**.
- Developed a resilient backend infrastructure with **Flask** and ensured secure data management using **MySQL**, enhancing user practices **by 40%**.
- Incorporated a **machine learning model** for waste classification, achieving an accuracy level of **85%**. GitHub: [Link](#)

Technical Skills

Programming Languages: Java, JavaScript, Python **Frontend Technologies:** HTML5, CSS3, Bootstrap, JavaScript, jQuery, ReactJS **Backend Technologies:** Node.js, Express.js, Flask **Databases:** MySQL, MongoDB, Firebase
AI/ML & Generative AI: GenAI, Retrieval-Augmented Generation (RAG), LangChain, Agentic AI Fundamentals
Cloud & DevOps: AWS, Docker, Kubernetes **Tools & Technologies:** Git, GitHub, RESTful APIs

Achievements

Finalist in Smart India Hackathon, Gujarat Government - Dec, 2024

Finalist in CyberX Hackathon by Greater Chennai Police, VIT - Chennai - May, 2023

Finalist in Smart India Hackathon, Ministry of Education, India - Aug, 2022
